

LoanLogics Loan Quality Audit Services

Take outsourcing ROI to a new level with technology enabled mortgage quality control audit services

LoanLogics IDEA™, intelligent data extraction and automation, and the LoanHD® loan quality management platform are at the core of our services. This data-driven digital technology delivers “purified data” to power automation for true exception-based audits and industry-leading loans per person per day productivity.

The Right Partner for You

Compliance expertise, scalability and resource costs are just a few of the reasons lenders choose to outsource loan quality. Finding the right partner, however, can feel like a zero-sum game where you're gaining in some areas and losing in others.

As an extension of your team, LoanLogics brings accuracy, granularity and timeliness to your audits, as well as high value insights for process improvements.

We provide a unique combination of experience and technology that is backed by more than a decade of proven results. Explore a new level of outsourcing ROI with us.

Our Technology-Enabled Services

Choose from one of our standard audits or we can work with you to customize one specific to your needs.

The optimal quality outsourcing experience

We know what it takes to deliver ROI for loan quality audit services.

Standard Results Within
48 Hours or Less

Complete Post-Closing
Results Within 30 Days

Comprehensive

- Create purified data. Compare 100% of data from loan file documents and lender systems.
- Tailor your QA/QC projects to your business' needs, incorporate lender defined tests.
- Integrate 3rd party data services into your reviews (appraisal, compliance, credit, fraud).

Efficient

- Provide earlier defect insights to origination teams with a flow basis QC review.
- Create your own stratified, discretionary and/or statistical sampling to tee up loans for review.
- As defects are found, engage in a real-time rebuttal process safely and securely via online portal.

Insightful

- Get instant insight with 100+ preconfigured and unlimited custom reports.
- Satisfy agency requirements. Report on work performed by LoanLogics at any time.
- Create action plans to address root cause of defects and track the plans to fix them.
- Dynamic dashboards provide SLA transparency through project status and loan level drill-down.

"The reality is, unless internal or outsourced loan quality management is backed by business rules driven automation, true efficiency and staff optimization is not possible."
